Comprehensive recycling solutions for:

- Hotels
- Restaurants
- Offices
- Retail
- Condominiums
- Apartment Buildings
- Schools
- Warehouses/Industrial Properties
- Festivals and Special Events

LETS GET YOU TO ZERO WASTE

PAPER

Each metric tonne (1000 kilograms) of paper that is recovered from landfill saves 17 trees from being cut down. P.E.L. recycles all types of paper products from office and news-paper, to pizza boxes and milk cartons.

COMPOST

Organic material is a major problem in our landfills and P.E.L. is the only commercial recycler that collects compostable material! Landfilled organics produce methane, and due to its greater impact, (absorbs infrared radiation 21 times as effectively as carbon dioxide) methane causes more intense climate change. Our hotels and restaurants recycle almost 100 metric tons a year and the volumes are growing. Offices are getting on board and recycling their coffee grounds and fruit peels - every bit helps!

MIXED PLASTICS

P.E.L. recycles many types of plastic materials. This includes all numbered containers, 1-7, soft plastics, such as shrink and bubble wrap; plastic strapping and other specialty plastics - just provide us with a sample of the material and we will assess whether they can be recycled.

BEVERAGE CONTAINERS

Let your bottles pay for your recycling! Many of our clients use the revenue from recycling their refundable beverage containers to subsidize their other recycling! Refundable beverage containers are all those glass, plastic, aluminium, tin and tetra pak containers that hold ready-to-drink beverages. And, as of June 2009, milk containers become a refundable beverage container.

GLASS AND METALS

From pickle jars to soup cans - we can help you recycle them. All that we ask, is that you take off the lid and give them a rinse.

OUR GOAL AND OUR PROMISE

We are committed to becoming your complete recycling solution and helping you divert as much material as possible. And all our reprocessors are vetted by Clean Calgary or other agencies to ensure your material is recycled properly.

Last year our clients's recycling equivalence was: 14 cars off the road for a year, the energy to power 198 computers for a year and they saved over 3300 trees and 667 barrels of oil.

"Ask us how we can help you make Calgary a greener city."
